🏭 Industrial AI Factory Control Room

Digital twin operations dashboard for fleet health, failure forecasting, and maintenance prioritization.

Model: Random Forest | **Focus Machine:** MCH-022 | **Window:** 2024-01-01 → 2024-08-27

Machines in View	Critical	High Priority	Avg Health	Avg 30D Risk
60	3	13	62.9	37.3%

Critical High Watch Normal

Control Room | Factory Map | Machine Digital Twin | Model Intelligence

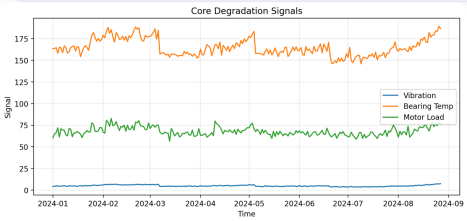
Machine Health	7D Risk	30D Risk	Predicted RUL
14.1	53.0%	81.5%	19.6 days

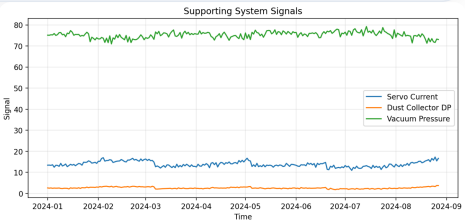
Maintenance Recommendation

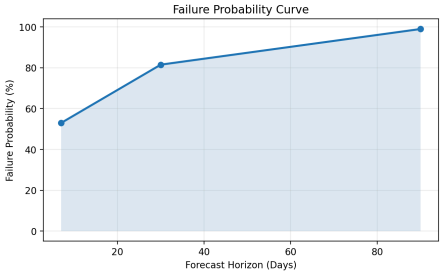
Priority: **Critical**

Action: Immediate inspection and maintenance planning.

Primary drivers: vibration, bearing temperature, motor load, servo current, and maintenance interval.







Latest Condition Snapshot

Built specifically for the industrial_time_series_dataset_v2.csv and the associated trained model artifacts.
